

Getting to the Root of Acne!

WHAT EXACTLY IS ACNE?

Bacteria causes acne (P.acnes), It grows at the root of hair follicles deep inside your skin. Sebaceous glands become inflamed or infected and blemishes occur. You must kill the bacteria to clear acne.

Note about Hormones:

Adult acne is often hormonal, so I do encourage you to use progesterone crème if you are experiencing female adult acne

To treat/prevent acne

1. Benzoyl Peroxide (BP) is key for anyone with mild to severe chronic acne. The BP molecule penetrates deep and kills acne where it starts. BP is the "gold standard" for treating acne. The Vivant line by James Fulton, M.D. has been the most successful acne product line that we have ever seen
2. An acne toner is valuable as it clears skin of contaminants. However, if you wish to skip this step you can. I do recommend it though for best results.
3. To prevent acne, glycolic acid is a great starting point. It unclogs pores and also minimizes their appearance. It clarifies and penetrates to keep skin fresh and glowing. For a tendency toward occasional acne start with Glycolic. It can also reduce scarring & prevent future acne. Rejuvenate T.R. is our glycolic product.

Tackling acne

. . . . Its not that hard

BASICS: My favorite basic & economical products for acne are Rejuvenate T.R. (with Glycolic acid & Vitamin A) and Buffing Pearls Cleanser. Your face will GLOW! Acne will have a difficult time re-occurring. This may be all you need.

AGGRESSIVE TREATMENT:

If you want or need a more aggressive regimen, I carry the products by Dr. James Fulton, America's leading acne Doctor. Dr. Fulton is co-inventor of Retin-A, the leading prescription acne product. Dr. Fulton became a dermatologist because he had horrible acne in his youth & dedicated his career to helping others like you. His products are a bit more expensive, but you will not be disappointed

"I cannot put into words, the miracle your products are for my face. Since I was 16 I couldn't go out without makeup and when I was wearing makeup, my face still looked bad. I don't want to remember those days. I has no self-confidence and really bad acne I was not happy. I didn't want to go out or talk to people. I tried everything in the world. I spent so much money, but now FINALLY here I am with beautiful skin. Its clean & shiny and every morning when I go to wash my face I cry. I thank God for this miracle. Thanks Dr. Barbara for giving me new life." -N.S., CA
